Please respond to jsmith

Amy-

Per your request, below is a breakdown of costs (current and projected):

**Current bottled water supply:**

\$3.15/5 gal X 10 gal/week X 6 residents\* = \$37.80/week (\$151.20/month)

\$3.00/month cooler rental fee X 6 residents\* = \$18.00

TOTAL BOTTLED WATER COST = \$169.20/month

**Project alternate water supply:**

New deep well: \$3,000.00 (no recurring costs anticipated after installation)

Ion exchange system: \$1,995.00 each (installed); \$7.50/month for each unit (recurring cost for salt replacement)

It should be noted that there are 7 "eligible" residents that are covered by the order. At this time, only 6 of the 7 have requested and are receiving bottled water ((b) (6)) has never contacted us to request bottled water).

If you need anything else, please give me a call.
